Abhishek Mishra

Senior Software Engineer · Web · AI Products · Real-Time 3D

Noida, India · abhishek.boss31@gmail.com · +91 96503 64697 · github.com/abh1shekmishra · linkedin.com/in/abh1shekmishra · abh1shekmishra.vercel.app

SUMMARY

Software engineer with 3+ years shipping production software end-to-end, from real-time 3D/XR in Unreal Engine and C++ to modern web products in React, Next.js and TypeScript with AI on the Claude and Google APIs. I ship independently: a live AI lead-gen product, a fully tested TypeScript PWA, and enterprise 3D visualization used by real clients. High ownership, product-minded.

EXPERIENCE

Senior Software Engineer, Trezi (SmartVizX) June 2023 – Present

Noida

- Built immersive AR/VR and desktop visualization tools in Unreal Engine 5 and C++, tailored for architecture and design professionals.
- Developed real-time scenes with performance-optimized rendering pipelines, light building, and occlusion strategies.
- Built internal Unreal Engine plugins that automated repetitive production workflows for the team.
- Built browser-based 360° property viewers (Three.js, WebGL, WebXR) alongside the native apps, and added cross-device AR support (ARKit, ARCore, OpenXR).

Customer Service Associate, Amazon Oct 2019 – May 2023

Noida

- Took on Training Subject Matter Expert responsibilities on an interim basis, training and onboarding new team members.
- Recruited and onboarded new hires, and introduced process improvements that raised team productivity.

SELECTED PROJECTS

LeadScraper · *Next.js, TypeScript, Claude, Google Places*

live demo · github.com/abh1shekmishra/LeadScraper

- Full-stack AI product that finds businesses, probes each website server-side to detect a **provable** digital gap, scores leads hot/warm/cold, and drafts personalized outreach with Claude.
- Built on one rule the whole pipeline enforces: never make a claim the tool can't prove. Probe classification, scoring, and prompts all respect it. Unit-tested engine (Vitest), CI, and a keyless zero-cost demo mode.

Undercover (impostor-who) · *React, strict TypeScript, Zustand, PWA*

live · github.com/abh1shekmishra/impostor-who

- Offline-first party game with a pure, deterministic, fully unit-tested game engine (seeded RNG, 42 tests) cleanly separated from the UI.
- 11 modes driven by declarative rule flags so the engine never branches on a mode id; persisted state machine with versioned migrations. GitHub Actions CI.

Mahindra Citadel, real-time digital twin · *Unreal Engine, C++, AWS Transcribe (client: Mahindra Lifespaces)*

- Real-time 3D digital twin of a residential project with fully explorable VR and desktop modes and avatar-based, human-scale navigation.
- Integrated AWS Transcribe and Speech for a real-time in-app voice concierge, and optimized rendering for smooth VR and desktop performance.

Prism, Unreal Engine plugin for AR/VR workflows · *C++, UE5 (Trezi internal tool)*

- Custom UE C++ plugin automating repetitive VR scene setup (batch light building, auto collision/navigation meshes, material switching) to streamline the design-to-deployment pipeline.
- Reusable across projects; cut AR/VR presentation setup time for designers and clients by up to 30%.

broll · *Python, Flask (private, demo on request)*

- Local, bring-your-own-key tool that ranks and downloads stock B-roll against a shot list using a free relevance model (tag overlap, resolution and position scoring). Unit-tested ranking (pytest), CI.

Eldeco 360° Web Viewer · *Three.js, WebGL, WebXR*

- Web-based 360° property visualization tool with VR integration, deployed across multiple properties, bridging real-time 3D and the web.

SKILLS

Languages: TypeScript, JavaScript, C++, C#, Python, HTML/CSS, SQL (basic)

Frontend / Web: React, Next.js, Tailwind CSS, Zustand, Framer Motion, Vite, PWAs, REST APIs

AI / Product: Anthropic Claude API, prompt engineering, AI-assisted development (Cursor, Copilot), rapid prototyping

Real-time 3D / XR: Unreal Engine 4/5, Blueprints, Unity, Three.js, WebGL, WebXR, AR/VR, rendering pipelines, performance optimization

Backend / Tooling: Node.js, Flask, Git/GitHub, GitHub Actions (CI), Vitest, pytest, ESLint/Ruff, Vercel

EDUCATION

Bachelor of Computer Applications (BCA), IGNOU (incomplete) 2018 – 2020

JD Academy, Sahibabad 2014 – 2017

Senior Secondary (2016–2017) · Secondary (2014–2015)
